

Kuppala Guru Subhash

Software engineering

Kgurusubhash@gmail.com

Ph No : 7732010001

Education

REVA UNIVERSITY
MASTERS IN COMPUTER APPLICATIONS 3rd semester
Excepted Graduation July 2024 - 2026 C.G.P.A : 7.82

REVA UNIVERSITY
COMPUTER SCIENCE & ENGINEERING
2020 - 2024 C.G.P.A : 8.23

SRI CHAITHANYA IAS ACCADAMY
MPC
2018 - 2020 C.G.P.A : 8.86

CAPTIAN K K SWAMY SCHOOL
10th class C.G.P.A : 9.22

Skills

Languages : Java, JavaScript, SQL, C

Frameworks : React.js, Node.js, Express.js

Backend & APIs : REST APIs, Microservices

Databases : MongoDB, MySQL

DevOps & Cloud : Docker, Jenkins, CI/CD Pipelines, AWS, Azure

Tools & Platforms: Git, GitHub, Linux

Core Concepts: Data

Structures & Algorithms,

OOPs, System Design (Basics)

Other: Machine Learning,

Language

- Kannada • English
- Hindi
- Telugu
- Tamil

About Me

Software Engineer skilled in full-stack development and DevOps, with expertise in the MERN stack and Java. Experienced in building scalable APIs, automating CI/CD pipelines, and deploying containerized applications on AWS and Azure, improving deployment efficiency by ~40% and system reliability up to ~99.9%. Strong in designing microservices-based architectures and optimizing application performance, with hands-on experience integrating machine learning models for real-world use cases.

Projects

MULTIPLE MESH DRONE NETWORK FOR DISASTER MANAGMENT • Javascript • ExpressJS

- Developed a decentralized drone communication network for real-time SOS and location tracking.
- Designed low-latency data transmission for disaster environments.

Automated Data Flow System with API Integration • Python

- Integrated frontend and backend systems using FAST APIs across separate repositories.
- Smooth data flow with real-time updates and accurate

TWO FACTOR WORM DETECTION • Python • html

- Built a packet analysis system using signature and anomaly detection with ML models to identify and predict malicious network activity.

CI/CD Automated Web Platform • MERN • Javascript

- Built a web application leveraging MongoDB, Docker, Jenkins, and Azure to automate CI/CD pipelines and cloud-based container deployment.

Experience

CropNow : [Dec 2025 - Till Today] SOFTWARE TEAM LEAD

- managed project data using spreadsheets for tracking
- Backend flows and pipeline management
- CSC Member , follow up tasks and deadline management

Certificates

- Rapid Execution and Commitment Award by **cropnow**
- Culture actives certificate in dance
- MEVITechnologies code to cloud participate certificate
- Badminton (CSE school level) [sports]
